

# INTRODUCTION

Cyrix Wallet is an innovative crypto wallet designed to combine high-level security with the ease of NFC (Near Field Communication) technology. With Cyrix Wallet, users can store, manage, and transact cryptocurrencies more quickly and securely with just a tap of an NFC card.

# KEY FEATURES

## Advanced Security

- End-to-End Encryption: All transaction data is fully encrypted to protect user information from unauthorized access.
- NFC Authentication: Users can securely access their wallets using an NFC card, providing an additional authentication method.
- Multi-Signature Support: Enables multi-signature transactions for added security.

## Ease of Use

- Fast Transactions with NFC: Users can quickly complete crypto transactions by simply tapping their NFC card, eliminating the need for extensive manual input.
- Intuitive Interface: User-friendly design ensures that even beginners can easily navigate and use the wallet.

## Wide Compatibility

- Supports Multiple Cryptocurrencies: Cyrix Wallet supports various popular cryptocurrencies, including Bitcoin, Ethereum, Litecoin, and more.
- DeFi Integration: Easy access to decentralized finance (DeFi) services to maximize the potential of your crypto assets.

## Additional Features

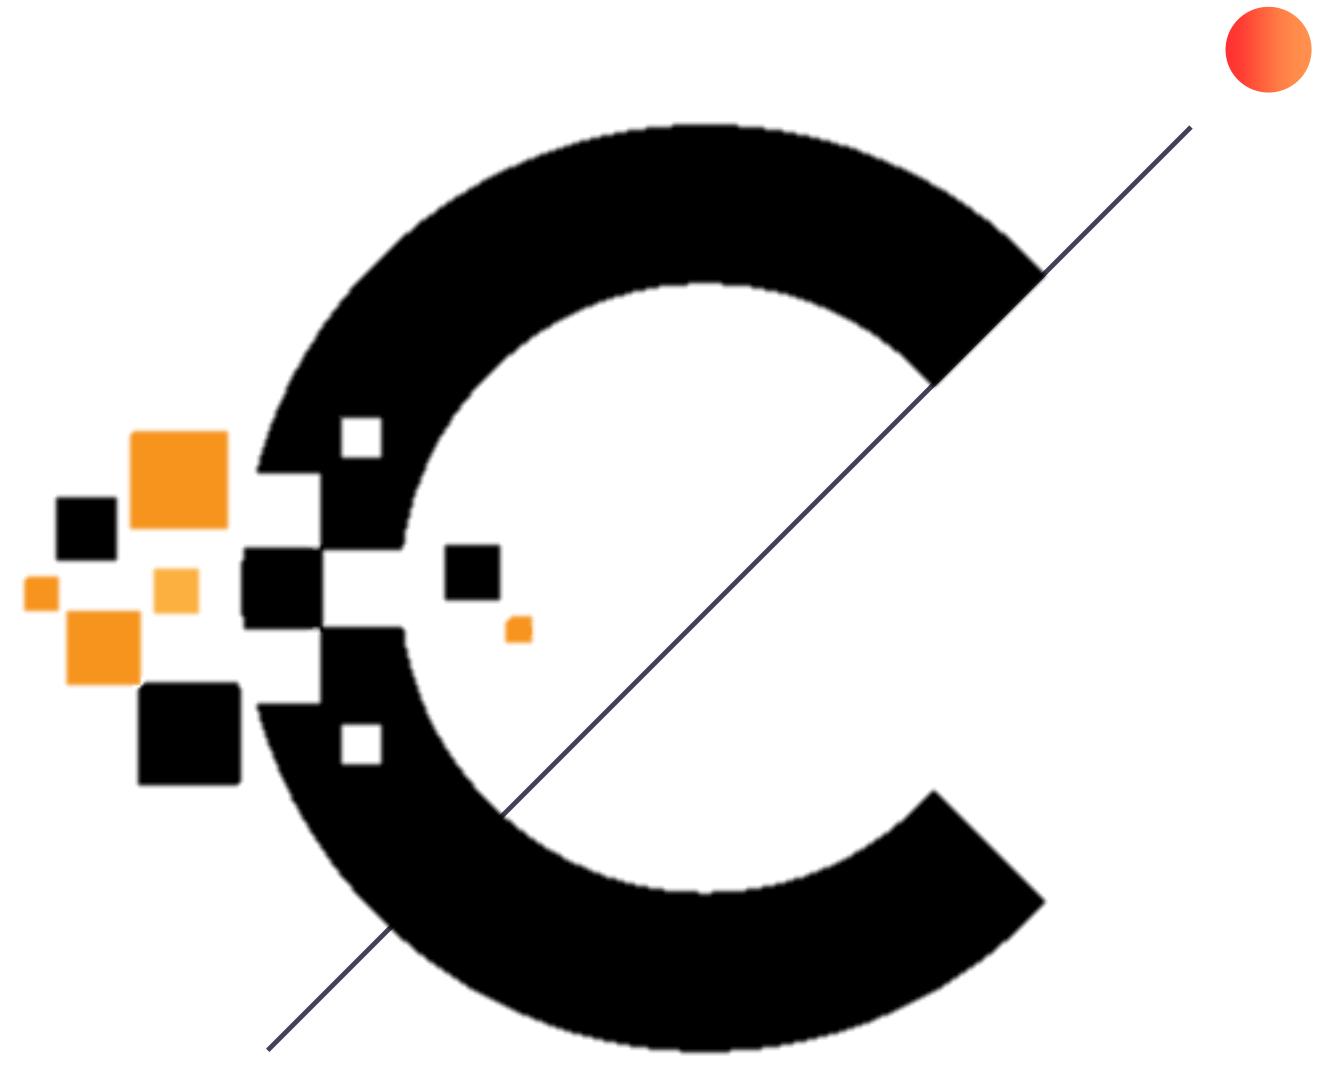

- Real-Time Notifications: Instant notifications for every transaction made or received.
- Portfolio Management: Monitor and manage your crypto portfolio with integrated analytical tools.
- Backup and Recovery: Backup and recovery features ensure you never lose access to your wallet.

# ADVANTAGES

- Leading Security: Utilizes the latest security technologies to protect your digital assets.
- NFC Innovation: Integrates NFC technology for a fast and convenient user experience.
- Global Accessibility: Usable anywhere in the world, with support for multiple languages and currencies.

## WHY CYRIX WALLET ?

With Cyrix Wallet, you get the perfect blend of security and convenience. It's the ideal solution for crypto users looking for a modern and secure way to manage their digital assets. Whether you are new to the crypto world or an experienced user, Cyrix Wallet offers features designed to meet all your needs.

# ROADMAP

## CONCEPT

- Conduct market analysis to understand the demand for NFC technology.
- Study existing products and identify unique value propositions.
- Define key features and functionalities of Cyrix Wallet.
- Create initial wireframes and design prototypes.
- Develop a comprehensive project plan.

01

## DEVELOPMENT

- Set up servers, databases, and blockchain nodes.
- Develop the core wallet functionalities.
- Develop UI for mobile (Android/iOS) and web.
- Integrate NFC technology.
- Implement user authentication and management features.
- Integrate with multiple blockchain and cryptocurrencies.
- Develop and integrate DeFi functionalities.

02

## TESTING

- Test individual components for functionality and reliability.
- Ensure seamless interaction between the NFC components.
- Conduct beta testing with a group of selected users.
- Gather feedback and make necessary improvements.
- Perform security audits and penetration testing to ensure robustness.

03

## LAUNCH

- Develop a marketing strategy.
  - Website and social media launch.
  - Release a beta version.
  - Monitor usage and data for adjustments.
- Launch Cyrix Wallet officially on app stores and web.
- Initiate marketing campaigns.

04

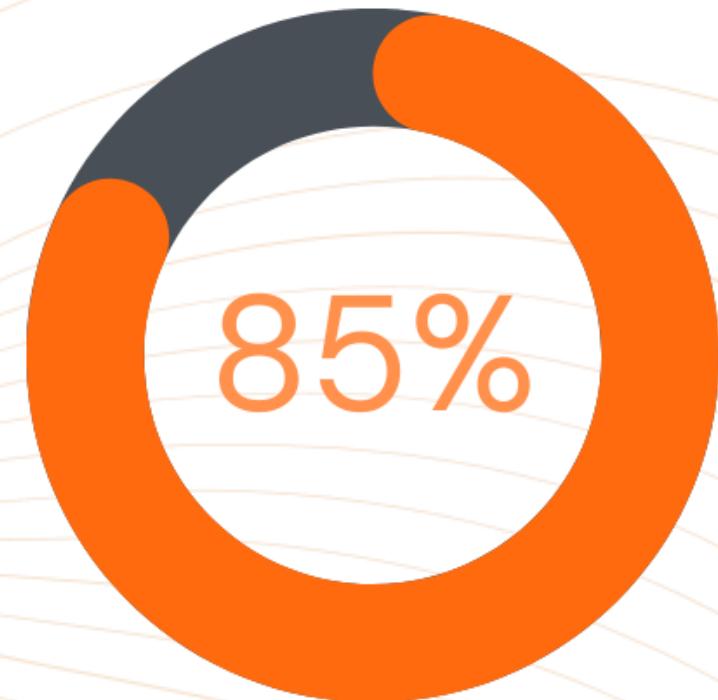

## EXPANSION

- Provide customer support.
- Gathering user feedback for improvements.
- Roll out regular updates to introduce new features.
- Expand cryptocurrency support and integration.
- Encourage user participation and gather insights for future development.
- Looking for partnerships and collaborations.
- Explore new markets and regions to expand the user base globally.

# TOKENOMICS

LIQUIDITY POOL

This means 85% of the token supply, which is 187,408,544,000 tokens, will be allocated to the Liquidity Pool. Ensure sufficient liquidity for trading and facilitate smooth transactions within the Cyrix Wallet ecosystem. This large allocation helps maintain stable prices and allows for efficient market operations.

STAKE REWARDS

This means 5% of the token supply, which is 11,024,032,000 tokens, will be allocated to Stake Rewards. Reward users for staking their CYX tokens. This incentivizes long-term holding and active participation in the network, contributing to the security and stability of the ecosystem.

MARKETING

This means 10% of the token supply, which is 22,048,064,000 tokens, will be allocated to Marketing and Partnerships. Fund marketing campaigns and strategic partnerships. This allocation supports promotional activities, community building, and collaborations with other projects to grow the user base and enhance the Cyrix Wallet ecosystem.

# TOKEN USE CASES

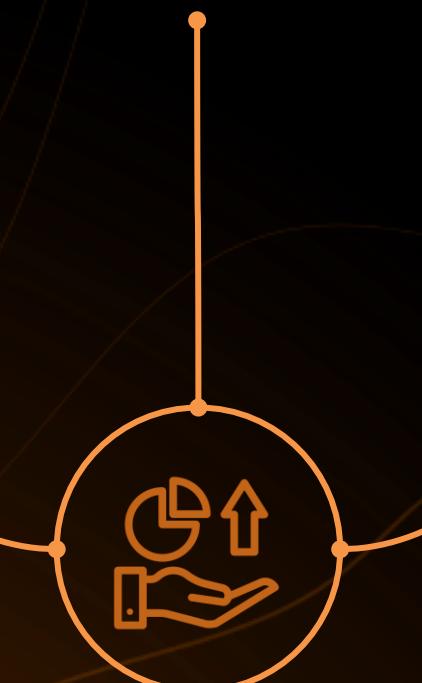

## Transaction Fees

- Users can pay transaction fees within the Cyrix Wallet ecosystem using CYX tokens.
- Discounts: Offering discounts on transaction fees when paid

## Staking & Rewards

- Users can stake CYX tokens to earn staking rewards.
- Higher staking levels could unlock premium features and benefits within the wallet.

## Governance

CYX token holders can participate in governance decisions, such as proposing and voting on new features or changes to the Cyrix Wallet ecosystem.

## Incentives & Loyalty Program

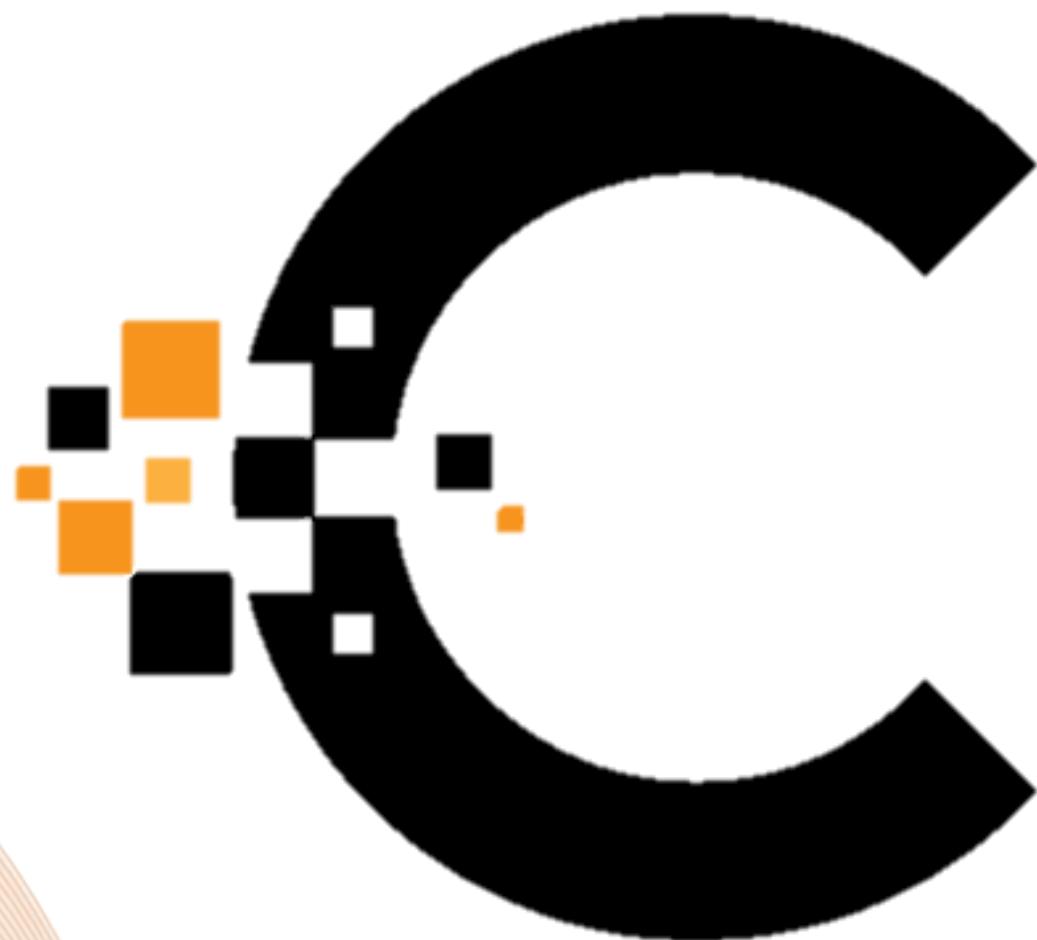

Reward users with CYX tokens for various activities, such as referring new users, participating in promotional events, or using specific features of the wallet.

## DeFi Integration

Use CYX tokens as collateral for loans or to participate in yield farming and other DeFi activities within the Cyrix Wallet.
